Lead Web Dev, UI Designer & User Advocate

July 2011 - Present

Web Developer & UI Designer

April 2010 - July 2011

Loop Management, LLC - Clearwater, FL

Responsible for the design and front-end development of several large web applications accessed by both internal and external users. Core technologies used are C# ASP.NET, HTML, CSS and JavaScript in an Agile work environment.

Lead a distributed team of 4 front-end web developers to collaborate with a larger team of backend engineers, Product and Project Managers, as well as various stakeholders throughout the company.

Perform code and design reviews, enforcing standards for maintainability, consistency and quality. Complete team member evaluations and conduct interviews for hiring.

From conception to completion, contribute to the definition, design and rapid development of features and products.

Passionately take ownership of projects. Emphasize web standards, simplicity and usability for user-interface design, data visualization, and user workflow.

extras

Recipient of 2012's "AutoLoop Top Performer Award", as determined by engineering team poll and company executive consensus.

Participant of Rails Rumble 2012 and 2013 hackathons.

Member of various local meet-ups, including Suncoast.js, Rails Brigade, Central Florida Web Developers User Group and Front-End Design.
